

**Title: Challenges to translation in microfluidics and organ-on-chip**

Venue: Room 235, Advanced Research Centre, University of Glasgow, 11 Chapel Ln, Glasgow G11 6EW

**26<sup>th</sup> February 2026**

17:30 – 19:00 Pre-registration and reception

**Program on the 27<sup>th</sup> February 2026**

| Time                                                                                | Speakers                                                                                                                                                                           | Title                                                                                                                         |
